WORK EXPERIENCE

Manager - MIS & Strategy

Jhamtani

10/2023 - Present

- **Performed market and sales analysis** using **CRE Matrix** and other data sources to evaluate **pricing trends, sales velocity**, and **revenue**
- **Designed and implemented Row-Level Security (RLS)** in Power BI to ensure secure, role-based access to sensitive business data.
- **Developed and deployed interactive Power BI dashboards** for **Sales Strategy, Pre-Sales, CRM collections-** , and **Marketing Expense Analysis**, improving reporting efficiency by **~30%** through data modeling and Power Query optimization.
- **Utilized advanced DAX (Data Analysis Expressions)** to create **calculated columns, measures, and tables**, enabling deeper analytical insights and custom KPIs.
- **Led and mentored a 3-member team** responsible for ERP maintenance, **report automation**, and **employee training**, ensuring seamless operations and high data reliability.

Junior Engineer - PropTech

Vilas Javdekar Developer

04/2022 - 10/2023

- Designed and developed MIS frameworks to collect, process, and present **business-critical data for decision-making**.
- **Proficient in ETL (Extraction, Transformation, and Loading)** processes, **Operational Data Store (ODS)** concepts, **data marts**, and **OLAP (Online Analytical Processing)** technologies for efficient data integration and analysis.
- **Managed data relationships** (active/inactive) and optimized **data models** to improve dashboard performance and accuracy.
- **Train end-users on ERP** and MIS functionalities to enhance system adoption and minimize downtime.
- Succesfully implemented **Darwinbox and Sales App**.

Junior Engineer

Vastu Const

06/2020 - 11/2021

- Develop and maintain automated reporting systems to track billing performance, revenue trends, and key financial metrics.
- Manage purchase orders, track inventory levels, and ensure optimal stock availability.

SUMMARY

Results-driven Business Intelligence and Data Analytics professional with over 5+ years of experience in BI reporting, data analysis, business analytics, MIS operations, and ERP management. Proficient in developing automated reporting systems, interactive Power BI dashboards, and optimized data models to streamline reporting workflows and support data-driven business decisions.

SKILLS

Python   ERP System   MS Excel
